

## Reset Notes

Get positions of all starting turtles.

```
t1, show pos
-347 -59
t2, show pos
-352 -117
t3, show pos
-352 -169
```

Create a procedure that puts them back to the start.

```
to reset
t1, setpos [-347 -59]
t2, setpos [-352 -117]
t3, setpos [-352 -169]
end
```

To start all turtles (without having to name them all)

```
everyone [clickon]
```
